A Little Re-Introduction

To your on-demand data team

The Story So Far...

We Started Your Analytics Journey

We created the analytics pipeline which centralised data from Nexudus, Oracle Netsuite, ACT, and Excel into automated reporting. We then passed this onto your first analytics hire, Sam.

Be sure to check out the full case study by clicking below!

Case Study

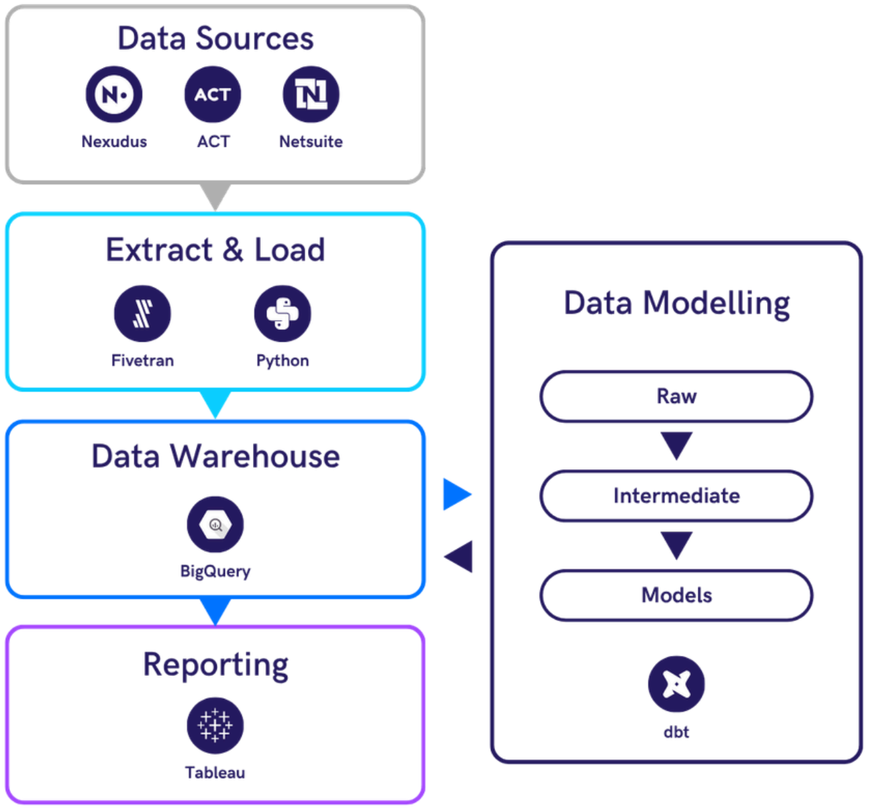

We Supported Your Team

In the time since, you have been in maintenance. This means that we keep the pipeline and models we built up and running when API changes come into place. This means you do not need to hire a data engineer for this activity. We also help with ad hoc changes.

We Added In NetSuite

Last year we helped with the migration from Xero to Netsuite by incorporating this into your reporting layer.

Your Data Stack Today

173tech can help accelerate

Source Data
Nexudus, ACT, Excel, Netsuite

Descriptive
Tableau Dashboards for reporting

Prescriptive

Activation
We have a few alerts set up but very little.

Where We Could Help

1

BI Layer

We can help to migrate WL away from Tableau to a chosen BI tool. We think the easier to understand and use, the more likely you will see adoption and so recommend Metabase.

2

Modelling

Whilst your system is running 4+ years later, it might be time to think about how reporting can be enhanced and automated for the future.

3

Forecasting

We previously talked to Jules about: Resident revenue projection (Contracted, Contracted + Renewals) Co-Working , Net Member Movements, Seasonality & Meeting Rooms.

4

Maintenance

We can simply continue keeping the pipeline up and running and ensuring that timely insights reach your team!

173tech

Your Amazing Team

Working with 173tech is **effortless**: wake up, log in, and instantly tap into a full data team at your fingertips. From strategy to implementation, we make **leveraging data for growth** easy and hassle-free.

Our core team previously led analytics at dating giant Bumble and we have since been using data to accelerate growth for the likes of MeUndies, Plend Loans, Wizards Of The Coast, MUBI and many more.

We **augment busy teams** to help centralise, analyse and activate data from across the customer journey.
